Art Unit: 2862

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Coryea et al, of record, in view of King et al.

Coryea discloses all of the claimed subject matter except for the display being scalable.

King teaches providing a scalable display for an energy management device. It would have been obvious to provide a scalable display as claimed to the meter of Coryea in view of the teaching of King.
